

FISCAL YEAR 2006 – 2007 GRANT RECIPIENTS

The U.S. Department of Energy's State Energy Program (SEP) assists OED in carrying-out these grant opportunities.

ALTERNATIVE POWER & ENERGY (AP&E)

*The **APE Grant Program** will provide cost share grants to Indiana's public, non-profit, commercial, industrial and agricultural sectors for the purchase and installation of alternative energy systems.*

Alternative energy systems make use of non-fossil fuel resources to produce clean, home-grown electricity and thermal energy. In a time of rising energy costs and increased energy supply volatility, it is vital to our economic future to diversify the portfolio of resources we use to produce energy.

Indiana has a variety of underutilized energy resources that can be used to achieve this goal. Often times these resources can be converted from costly liabilities to energy assets. The use of these local resources will help stabilize energy prices, while at the same time allowing Hoosiers to spend their energy dollars locally instead of exporting them out-of-state.
